Question:

Write a code and connections in Wokwi for the Ultrasonic sensor.
Whenever the distance is less than 100cms send an “Alert” to IBM cloud and display in the device recent events.

Code:

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. A sidebar on the left contains icons for various system components. The main content area is titled 'E8-D0-FC-C9-98-01' and shows the device's status as 'Connected'. Below this, there are two log sections: 'Diagnostic Logs' and 'Connection Logs'. The 'Diagnostic Logs' section indicates that no logs are available. The 'Connection Logs' section shows a list of connection events.
