

# Publish Data To The IBM Cloud

Team ID	PNT2022TMID48307
Project Name	Industry-specific intelligent fire management system

## Checking Data

The screenshot displays the IBM Watson IoT Platform interface. The main view shows a table of devices with columns: Device ID, Status, Device Type, Class ID, and Date Added. A search bar is visible above the table. Below the table, there is a section for 'Device Information' and 'Recent Events'. A data stream viewer is open on the right, showing a list of events with columns: Event, Value, Format, and Last Received. The data stream shows two events, both with the value '[{"temperature": 25, "humidity": 60}]' and the format 'json', received at the same time.

Device ID	Status	Device Type	Class ID	Date Added
1234	Disconnected	Node	Device	Nov 10, 2021 11:02 AM

Event	Value	Format	Last Received
event	[{"temperature": 25, "humidity": 60}]	json	5 minutes ago
event	[{"temperature": 25, "humidity": 60}]	json	5 minutes ago
